

Instructions:

- Using GitHub and the Command Line, do the following:
 - Create a new public GitHub repository, and name it whatever you like. Be sure to check the box for “initialize this repository with a README.”
 - Next, clone the repo to your local directory.
 - Then create an HTML file inside the local directory.
 - Add, Commit, and Push the code to GitHub.
- Bonus:
 - Find a partner in class and fork their repository to your own GitHub account. Clone this forked repository to your local directory.
 - Add, Commit, and Push the code back to your forked copy.
 - Finally, submit a pull request to send your changes to your partner’s repo.
